PROFESSIONAL PROFILE

Systems Analyst with experience in creating **end-to-end** digital solutions. Solid technical foundation to design **scalable architectures**, manage **relational databases**, and **deploy** systems into **production**. Focused on understanding **business needs** and translating them into **functional software**. Comfortable with Agile workflows and committed to quality throughout every stage of the software lifecycle.

EXPERIENCE

Full Stack Mobile Developer — VisuBook Booking & CRM SaaS Dec. 2025 – Present
Cross-platform iOS/Android · Proprietary product in production Remote

- **Mobile & Web Frontend Development:** Engineered the mobile application using **React Native (Expo)**, integrating secure storage, biometrics, and native camera capabilities, alongside a responsive, SEO-optimized **Public Web Portal** isolated under strict CORS policies.
- **API & Data Architecture:** Architected a modular **multi-tenant** infrastructure with 25+ endpoints in **Node.js/Express**, developing custom booking algorithms in **PostgreSQL** to prevent scheduling conflicts and handle real-time slot releases.
- **Security, Integrations & Deployment:** Implemented security protocols following **OWASP** standards (dual-token JWT auth, rate-limiting, bcrypt hashing) and automated production SaaS deployments (**Fly.io/Supabase**) integrating cloud services (**Cloudinary, Brevo, Sentry**).

Full Stack Developer — Mate Único E-commerce with Headless CMS Aug. 2025 – Dec. 2025
Degree Final Project — Systems Analyst · Demo available in portfolio Remote

- **Headless Architecture:** Designed a decoupled architecture (React + Node.js) using Strapi as a CMS, isolating the frontend from the business logic to enable independent scalability.
- **Payment Automation:** Integrated the Mercado Pago payment gateway (**Checkout Pro & Webhooks**), achieving real-time sales reconciliation and completely eliminating manual intervention in the payment flow.

EDUCATION

UADER – Faculty of Science and Technology Feb. 2023 – Present
Systems Analyst (Graduated Dec. 2025)

Bachelor's Degree in Information Systems (In progress, est. Dec. 2027)

PROJECTS & HACKATHONS

BobArchitectLegacyLens | *Next.js, NestJS, IBM watsonx.ai – Demo & Feedback* May 2026

- Developed a proof-of-concept using **Next.js** and **IBM watsonx.ai (Granite)** to transform legacy codebases into migration artifacts (schemas, API docs, and interactive ERD diagrams via **Mermaid.js**).

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, SQL
Frontend: React, React Native, Next.js, Expo, TailwindCSS
Backend: Node.js, Express.js, NestJS, Strapi CMS
Databases: PostgreSQL, MongoDB, Redis, Sequelize ORM
Tools: Git, GitHub, Docker, Postman, Sentry, Figma
Languages: Spanish (Native), English (Technical/Conversational)

CERTIFICATIONS

Cisco Networking Academy Jul. 2026
English for IT 1 Remote
lablab.ai Jun. 2026
IBM Bob Hackathon Remote
LinkedIn Learning Jan. 2026
React Essential Remote
Cisco Networking Academy Nov. 2025
Certification: Networking Technician Remote
Metal Code Sep. 2025
JavaScript Fundamentals Course Remote
