PROFESSIONAL PROFILE

Systems Analyst with experience in creating **end-to-end** digital solutions. Solid technical foundation to design **scalable architectures**, manage **relational databases**, and **deploy** systems into **production**. Focused on understanding **business needs** and translating them into **functional software**. Comfortable with Agile workflows and committed to quality throughout every stage of the software lifecycle.

EXPERIENCE

Full Stack Mobile Developer — VisuBook SaaS Booking & CRM Platform **Dec. 2025 – Present**
Multiplatform iOS/Android · Live product in production *Remote*

- **Architecture & Scalability:** Designed and implemented a **modular RESTful API (Node.js/Express)** with **over 25 endpoints**, following a **Multi-tenant** scheme, prepared to support multiple independent businesses with secure JWT authentication.
- **Business Logic Optimization:** Developed real-time time-slot validation algorithms on **PostgreSQL**, eliminating 100% of schedule overlaps and improving data integrity.
- **Security & Standards:** Implemented protections based on **OWASP** standards (Helmet, rate-limiting, bcrypt), ensuring the security of sensitive client information.

Full Stack Developer — Mate Único E-commerce with Headless CMS **Aug. 2025 – Dec. 2025**
Degree Final Project — Systems Analyst · Demo available in portfolio *Remote*

- **Headless Architecture:** Designed a decoupled architecture (React + Node.js) using Strapi as a CMS, isolating the frontend from the business logic to enable independent scalability.
- **Payment Automation:** Integrated the Mercado Pago payment gateway (**Checkout Pro & Webhooks**), achieving real-time sales reconciliation and completely eliminating manual intervention in the payment flow.

EDUCATION

UADER – Faculty of Science and Technology **Feb. 2023 – Present**
Systems Analyst (Graduated Dec. 2025)

Bachelor's Degree in Information Systems (In progress, est. Dec. 2027)

- **Materias Relevantes (NoSQL):** Implemented non-relational database solutions. Developed practical projects including a **Redis-backed API**, spatial data queries using **Geo Redis**, and data modeling in **MongoDB**.

PROJECTS & HACKATHONS

BobArchitectLegacyLens (AI-Powered Code Modernizer) | *Next.js, Tailwind v4, watsonx.ai, NestJS* **May 2026**

- Designed and implemented parallel API pipelines integrating **IBM watsonx.ai (Granite 4H Small model)** for architectural analysis, schema extraction, and Domain-Driven Design (DDD) clean code generation.
- Built a premium responsive dark-themed UI from scratch using **Next.js, TypeScript and Tailwind CSS v4**, with interactive **Mermaid.js** entity-relationship diagrams.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3

Frontend: React, React Native, Next.js, Expo, TailwindCSS

Backend: Node.js, Express.js, NestJS, Strapi CMS, REST APIs, JWT, OWASP

Databases: PostgreSQL, MongoDB, Redis, Sequelize ORM, Relational Schema Design (ERD)

Tools: Git, GitHub, Docker, Postman, Sentry, Figma, Agile Methodologies, UML

Languages: Spanish (Native), English (Technical/Conversational)

CERTIFICATIONS

LinkedIn Learning **Jan. 2026**
React Essential *Remote*

Cisco Networking Academy **Nov. 2025**
Certification: Networking Technician *Remote*

Metal Code **Sep. 2025**
JavaScript Fundamentals Course *Remote*
